

LIGHTperMETER's building blocks

ELECTRONICS: PHILIPS

Product benefits

Fortimo LED Strip systems are ideal for architectural applications. This third-generation LED Strip offers best-in-class module efficiency of up to 165 lm/W and range extensions with flux packages like those for traditional fluorescent lighting.

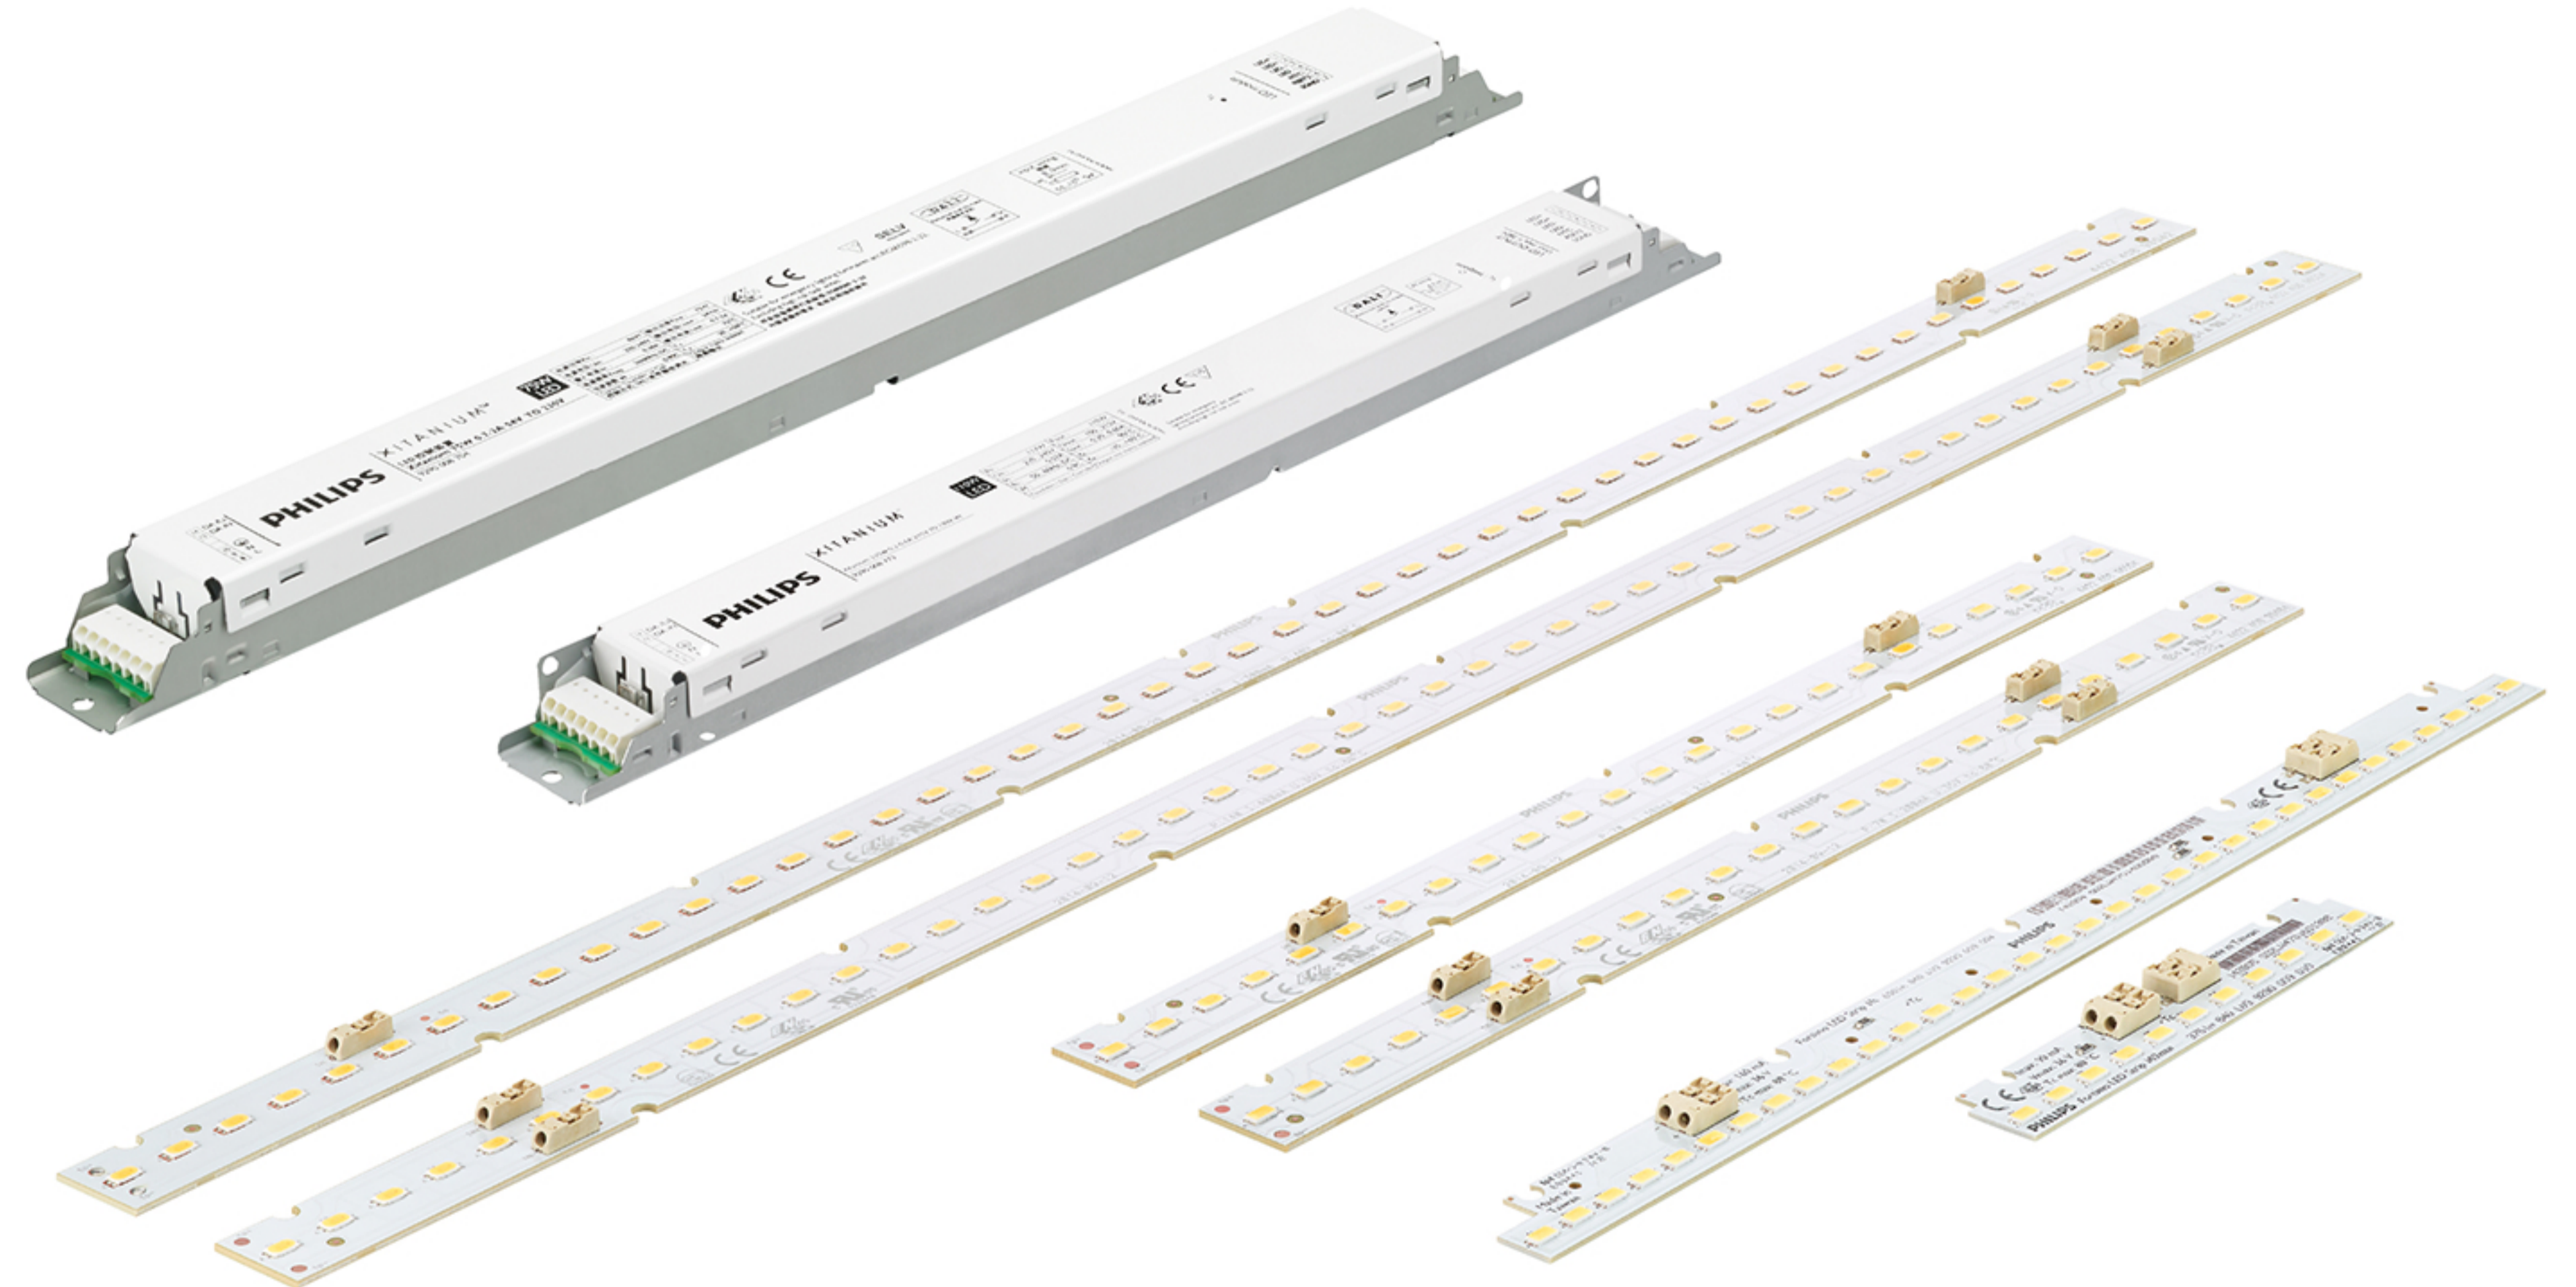

Philips has designed the LED module and driver around each other, making the system even more reliable. The Philips system warranty ensures that in the event of a failure or malfunction only one supplier is needed to resolve the problem. Titanium window drivers offer the freedom to adjust current settings and to differentiate in terms of lumen output, efficacy and lifetime, making it a very flexible system to work with.

Integrated in the LIGHTperMETER luminaires, these systems are ideal for surface linear and for indirect lighting.

The Fortimo LED Strip Gen3 1 ft 1100 lm and 2 ft 2200 lm have been designed to be Zhaga compliant.

Fortimo LED Strip Gen3 key features

- State-of-the-art LED module efficiency of up to 165 lm/W
- Long life-time: >50,000 hours
- High color rendering (CRI >80 and >90)
- Excellent color consistency of 3 SDCM
- Variety of color temperatures (3000 K, 4000 K and 5000 K)
- Two lumen packages: 650 lm and 1100 lm per foot
- Tunable lumen output, efficacy and lifetime
- Five year system warranty
